

NEW INITIATIVE

Secondary School
Social Enterprise Challenge

Late Booking Availability
Themed induction days,
enterprise days and more

Dear Teacher,

Introducing: ShP Social Enterprise Challenge

ShP Solutions are leading providers of specialist recycling services to companies across the UK. In 2005 we started our innovative Enterprise Challenge programme in Secondary Schools across England and Wales and are now very pleased to be up and running in Scotland.

The ShP Enterprise Challenge brings our business and your school together to provide a unique educational experience for a large group of pupils. We teach the principles of social enterprise and the responsible recycling of Waste Electronic and Electrical Equipment in line with the European W.E.E.E directive. Choosing to run ShP for Enterprise in your school has many benefits but most notably it:

- Provides a cross-curricular educational activity that meets the aspirations of Determined to Succeed and A Curriculum for Excellence.
- Makes a significant contribution to the evidence required to attain an Eco School flag.
- Engages pupils in developing waste awareness and the emerging social, environmental and commercial impacts of the information and communications age.

ShP challenge days have proven to be a huge success in engaging pupils to get the most out of an educational experience of this kind. Find on the reverse a summary of the learning outcomes you can expect as they relate to the four capacities and please do get in touch if you would like to know more.

Yours sincerely,

Ronnie Davidson
Enterprise Education Adviser

To discuss how you can use ShP for Enterprise to meet your school's individual needs and required learning outcomes, please contact Ronnie Davidson . . .

See over 

ShP for enterprise

“Many thanks for an enjoyable and successful day. As someone who delivers quite a few home-grown Enterprise Days, it was bliss to be relieved of the pressure of finding facilitators from business to work with groups of 53 students in separate rooms, with all the attendant worries of briefing sessions and charging around trying to keep everyone happy. ShP took the pressure off, and delivered a quality product. Mike (the main presenter) was high energy and remarkably patient. The students responded well to instructions and advice from the presenters. The students' presentations at the end were mixed, but with some real quality aspects. Mike's feedback to each group was detailed, useful and appreciative. The kids listened well. Everyone seemed to agree with the choice of winners, too. All in all, I would say £10 a head is a snip for a whole day's activity which addresses all the Core Skills and aspects of Enterprise as well as the four capacities of ACfE.”

Scarlett McGovern, Enterprise Co-ordinator, Castlebrae School, Edinburgh

Learning Outcomes from our School Enterprise Challenge

confident individuals

- Realising each one of us is important
- Becoming more confident
- More self-knowledge and self-belief
- Enhanced capacity to make the right choices
- Develop courage in your convictions
- Being prepared to stand up for what you believe in
- Develop an ownership of the environment
- Understanding the importance of a positive outlook in achieving results

successful learners

- Demonstrate understanding in the Waste of Electrical & Electronic Equipment (WEEE)
- Realise the benefits of social enterprise
- Develop key business skills important for a career in recycling
- Understand how a modern recycling business actually works
- Develop communication skills in a new setting
- Develop organisational and time management skills

To enable all young people to become

responsible citizens

- Learn the social, environmental and commercial effects of your actions
- Make good decisions and learn decision making skills and principles relating to e-waste
- Understand the principles of responsible recycling
- Develop the aspiration to make a difference
- Manage money and resources efficiently
- Develop new ideas about the value of reusable and recyclable materials

effective contributors

- Become responsible recyclers of waste
- Learn that enterprise and ambition can make a difference to the world around you
- Enhanced capacity to work in teams
- Use business planning principles to enable action and development
- Become enthused and develop passion about the importance of sustainability
- Realise the importance of the environment in businesses today and in the future
